## A PLACE FOR ALL:

# OUR PHILOSOPHY OF CARE

The Buckeye Ranch endeavors to provide an environment that offers children, youth, and families opportunities to navigate difficult emotions in safe way, develop and enrich healthy relationships, and build new skills and competencies. We know that can only happen when team members receive the training and support required to meet the complex needs of our clients.

Fundamental to creating and maintaining a restorative environment is adherence to the four foundational principles that are essential to healing and growth. These principles under-gird every program and practice that The Buckeye Ranch implements. They are equally essential to the growth and development of our team members.

# FOUR PRINCIPLES OF QUALITY CARE

Taking a **STRENGTHS-BASED** approach.

Having a **FAMILY-CENTERED** perspective.

Providing **TRAUMA INFORMED** care.

Being **CULTURALLY RESPONSIVE** with our team and those we serve.
